The BNC supports embedded fonts and also supports the following base 14 fonts:

Acrobat 3.x - 7.x

Arial (Regular, Bold, Italic, and Bold Italic)
Courier (Regular, Bold, Oblique, and Bold Obligue)
Helvetica (Regular, Bold, Oblique, and Bold Oblique)
Times (Roman, Bold, Italic, and Bold Italic)
Times New Roman (Regular, Bold, Italic, and Bold Italic)
ArialMT
CourierPS
TimesNewRomanPSMT
Symbol
ZapfDingbats

The BNC also supports embedded fonts. If you are using a font that is not in the list above, then the font must be embedded in the PDF. Some Word Perfect fonts can't be embedded due to licensing restrictions. You may want to contact Corel to see if they have a solution regarding the WP fonts and creating PDFs. The best solution is to use the supported fonts listed above.
